Company Overview

Golden Hills IT LLC is a California-based managed IT services provider established in 2020. We specialize in delivering secure, scalable, and responsive technology support for public sector agencies and private sector clients across the United States. Our mission is to eliminate IT headaches and deliver dependable outcomes that empower our clients to focus on their operations and missions.

From infrastructure projects and cybersecurity to co-managed support and compliance readiness, we serve as a strategic partner to organizations with complex needs and limited in-house IT resources. Golden Hills IT is fully licensed, insured, and registered in SAM.gov, with active engagements supporting both local governments and nationally distributed businesses.

Core Competencies

Managed IT Services & Support: End-to-end management of clients' IT environments, including 24/7 network monitoring, helpdesk support, and maintenance of desktops, servers, and mobile devices.

Cybersecurity & Data Protection: Implementation of robust security measures (firewall management, antivirus/anti-malware, endpoint protection, email security) and continuous monitoring to guard against cyber threats.

Cloud Services & Consulting: Expertise in cloud integration and management, including Microsoft 365 and Google Workspace deployment, cloud server hosting, and SaaS application management.

IT Infrastructure Design & Projects: Planning and executing IT projects such as network upgrades, new office IT setup, Wi-Fi optimization, and hardware/software deployments.

Compliance and IT Consulting: Advising and assisting organizations in meeting IT-related regulatory requirements such as HIPAA, GLBA, PCI-DSS.

Co-Managed IT Services: Flexible partnership models to support in-house IT teams with helpdesk overflow, specialized expertise, and licensing management.

Past Performance

Local Government & Airport Overhaul: Completed a full IT infrastructure redesign for a regional airport and local government agency, including server modernization, firewall and Wi-Fi deployments, new end-user devices, Microsoft 365 migration, endpoint protection, and long-term managed services.

Government IT Transition: Led a seamless transition for a public agency from an overpriced, underperforming IT vendor, implementing a new service stack and improving security.

Nationwide Energy Sector Support: Provide fully managed IT services for energy clients with teams across the U.S. and contractors operating internationally, including endpoint protection and global IT oversight.

Differentiators

Approachable, Client-Focused Service: Clear communication without jargon.
